What are the guidelines for solar PV system sizing?

ms.4. Guidelines for Grid Connected System Sizing Solar PV system sizing will be limited by two factors, the amount of physical space available for the installation and the electricity consumption profile of the building (load profile). Current regulations do not provide favourable incentives for systems to fe

How many standards are there for photovoltaic systems?

There are nearly 80 standards applicable to photovoltaic and five working groups in IEC TC82. For necessary safety requirements 'Quality and Standards' technologically need to be revised and up to date.

What are PV standards?

The standards series has been recognized by the World Bank and the United Nations Industrial Development Organization (UNIDO). Such standards also serve as the basis for testing and certification of components, devices, and systems. Two of the IEC Conformity Assessment Systems deal with PV parts, systems and installations.

What are IEC standards in photovoltaics?

IEC standards in photovoltaics were developed by TC82 "Solar photovoltaic energy systems" . The U.S technical advisory group (USTAG) feeds the input to IEC TC82 standards time to time. Both IEC and American Society of Testing and Materials (ASTM) International had published numerous PV standards in which many are similar and redundant.

What are the IEC PV standards?

The IEC PV standards comprise IEC technical committee 82 solar PV Energy System (IEC TC82) which develops and adopts all Photovoltaic related standards. There are nearly 80 standards applicable to photovoltaic and five working groups in IEC TC82.

Are there any UK standards relating to a PV installation?

While many UK standards apply in general terms, at the time of writing there is still relatively little which specifically relates to a PV installation. However, there are two documents which specifically relate to the installation of these systems that are of particular relevance:

digest 489 "Wind loads on roof-based Photovoltaic systems", and BRE Digest 495 "Mechanical Installation of roof-mounted Photovoltaic systems", give guidance in this area. 1.2 Standards and Regulations Any PV system must comply with Health and Safety Requirements, BS 7671, and other relevant standards and Codes of Practice.

A standard 60-cell 1.7m² solar panel weighs around 18kg, while a 72-cell 2.3m² module weighs around 23.5kg. Not only are 72-cell solar panels heavier, but their extra height makes them more difficult to carry and manoeuvre, and they can also be more vulnerable to being caught by wind gusts when being installed.
