Tork energy Pitcairn Islands

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with ...

The Pitcairn Islands comprise Pitcairn Island itself and three uninhabited islands, Henderson, Ducie and Oeno. Pitcairn is approximately 3km long and 1.5km wide. ... Work is also progressing on projects to provide sustainable wind energy and an alternate harbour to make the landing of supplies, tourists (particularly from cruise ships) and ...

A large part of Pitcairn Island's early history will forever remain a mystery. The full history of both the earlier Polynesian community and of the Bounty settlers will never be completely known.[See "Pre-Mutineer History"] Differing theories and contradicting stories concerning the events that took place after the mutineers arrived at Pitcairn, have been told.

The current Pitcairn Island dependency ratio (those under 18 and over 65 compared to the productive population) stands at 58 percent. The issue for Pitcairn Islands is that the ratio is trending in the wrong direction and by 2025 it will be over 100 percent. At this point there will be more pensioners than productive-age persons.

Pitcairn Islands Study Center contains the world's largest collection of materials relating to the Mutiny on the Bounty, Captain William Bligh, H.M.S. Bounty, Pitcairn and Norfolk Islands. ... but, with this, repairs to houses, and the replanting of gardens, there was no energy left, and much of the island reverted to natural bush. In 1868 ...
