Leading OEMs nationwide use our high-pressure components and fuel systems on their CNG Vehicles, with 6 out of 10 CNG passenger cars and 8 out of 10 CNG ...

Project description. Title: Green Hydrogen for sustainable growth and a low-carbon economy in Tunisia (H2vert.TUN) Commissioned by: German Federal Ministry for Economic Cooperation and Development (BMZ) Country: Tunisia Partner: Ministry of Industry, Mines and Energy (Ministère de l'Industrie, des Mines et de l'Énergie, MIME) Lead executing agency: Ministry of Industry, ...

Tunisia's strategy outlines a comprehensive roadmap for the development of its green hydrogen industry. The plan includes a massive expansion of renewable energy, primarily solar and wind, to drive green hydrogen production. In addition, Tunisia will repurpose its existing natural gas pipelines to transport green hydrogen, connecting the country to European markets.

Tunisia has launched a strategy to position itself as a global leader in green hydrogen production. With its rich solar and wind resources, the North African nation is set to harness these assets to produce clean hydrogen, a versatile energy source that can help decarbonise multiple industries. Tunisia's strategy outlines...

Tunisia's energy transition policy aims to reduce emission intensity by 46% by 2030 and green hydrogen

Tunisia greenfuel energy solutions

production will aid this goal. The Wuppertal Institute, in a study conducted on behalf of the German Government, emphasizes that Tunisia has a significant potential for the development of the hydrogen sector. The Agreement illustrates the ...

Tunisia is currently developing a national strategy for the development of green hydrogen. While the global energy sector is being revamped, the "clean" fuel approach is often hailed as the flagship solution for the challenges of energy deficits and ...
