It can also be used for kinds of shelves, ceiling frames, drywall partition, steel structure building, and so on. The series of Hangzhou Roll Forming Technology"s solar PV support forming machines can produce double-in-roll c-shaped steel photovoltaic brackets with consistently high quality at a stable speed.

Compared with traditional fixed brackets (the same number of solar panels), the new solar component bracket system represented by solar single-axis tracking brackets and solar dual-axis tracking brackets can greatly increase the power generation of solar modules.

3. The roll forming craft is made by the special Germany cold roll forming program COPRA; the craft is also made the FEA analysis and check. The structure of the rollers is combined, so the line speed difference and resisting force of roll forming is small. The sheet is easy to feed. All these assure the accuracy and stable of the roll forming.
