

Zappi myenergi Guinea

How does myenergi Zappi work?

The myenergi zappi seamlessly connects your electricity supply to your electric car. Once installed, simply plug in your EV and enjoy hassle-free electric car charging from the comfort of your sofa. Simple, eh! With zappi, you'll also benefit from our clever app that allows you to utilise economy tariffs and boost your charging speed.

Does myenergi's Zappi Charger work with other eV Products?

It also works with other MyEnergi products. MyEnergi's Zappi charging point is a smart EV charger for homes and businesses. It's available in four versions, each of which comes in white or black.

How can Zappi help you save energy?

Fast charge your EV at home while you sleep or work. Let zappi make the intelligent decisions around saving energy, ensuring you get the charge you need for the lowest cost, while you focus on doing the things you enjoy. zappi provides you with tailor-made charging to suit your lifestyle and demands.

How does the myenergi app work?

The MyEnergi app does a great job of showing you what's going on. Depending on your configuration, its default screen will show you the energy use in your home, what's being imported from the grid, and how much is flowing into your car. Tapping on any of the three icons brings up a more detailed view.

Come on guys, it's a great unit but you can do better than this. I think the unit is great but the manual supplied for the Update process must be for the Zappi 1 as it bore no relation to the switches on the Zappi 2. I did download the latest firmware to the Hub as instructed and found the bootloader menu in the Advanced options on the Zappi.

4 ???· Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

At myenergi we pride ourselves on providing our customers with the highest quality, UK made, EV home chargers. It's only natural that we want to ensure our customers get the best experience when looking to get their zappi installed. That is why we have personally handpicked some of the best myenergi-approved and trained installers in our network.

Set device priority so that Zappi is #1 and Eddi is #2. Your myenergi system should then behave as you wish. Note that the Eddi may consume the available surplus before there is enough for the Zappi. The Zappi needs a minimum of 1.4kW for single phase and 4.2kW for three phase.

Zappi myenergi Guinea

You should try to get the Zappi v2.1 with Lan/wlan. then the HUB is integrated in the Zappi and you only have to bring the lan with a powerline adapter to the zappi. The only challenge that remains is the Harvi for the ct. This is necessary for the timers! the Harvi is still connected to the zappi at 868mHz. See also here: [Communications-Principles](#)

zappi. Charge your car with grid, wind or solar energy. eddi. Divert self generated power back into your home. eddi+. The 3-phase solar power diverter. libbi. Libbi is a modular battery storage system that adapts to your needs. harvi. Save time, money and unsightly wiring. app. Manage and monitor your energy from anywhere. Accessories

Zappi versions that do not have the -T suffix comply with EN 61851-1:2019 with the exception of Clause 8.4 in order to meet the requirements of BS 7671:2018 Amendment 1:2020 which requires the protective earth conductor to be switched in order to provide protection against a damaged PEN conductor in a TN-C-S earthed electrical system

As @mcsmik says, you can turn off smart-charging - in the account settings ("face" icon in Octopus app). When off, it's easier to turn back on in the usual devices tab. Octopus T&C's seem to say you must use smart charging at least once in a 30 day period, or risk being thrown off the tariff.

A couple of days ago I updated my Zappi v1 but I encounter several problems. This is the first picture I'd like to start with. Maybe this is not related to the update, but this is the 3th time since the update this is on the display and of course, Zappi and Harvi are red on the Hub.

Hi I wondered if you are working with Octopus energy to enable the Intelligent octopus service to work with Zappi chargers. I am guessing they are working on only allowing the car to charge in off peak time, and so need additional information to make this happening.

I find this an irritating "feature" of the Untethered Zappi, if I terminate a charge in any way this happens, it's no good following the screen instruction to press the + to unlock the cable as it doesn't work. I press the menu then reset the Zappi to release the cable. It's never been any different! I just accept it.

Hi, I had a Zappi installed some weeks ago (ahead of the EV arriving). However - I stupidly set a password on the charger - but now cannot remember it ... Whilst these forums are lightly supported by MyEnergi staff, it seems to be just on a voluntary ad hoc (and frequently out of hours!) basis. For specific customer support such as this you ...

How do I find out whether my Zappi is v1 or v2? On the dashboard under my devices it says it is "SN 16114463 #183; v3560S3.147" but it doesn't actually say what sort of Zappi it is. If I download the technical info it gives a different serial number - "ZAPPI -207TW" but that doesn't say if it is a 1 or a 2 either.

So my untethered Zappi won't recognise my PIN, the cable isn't locked, the symbol is purple. ... myenergi & Products & zappi v2 & HELP! Zappi not recognising PIN. Share. Mit dem Pair Knopf auf dem Hub hat sich die Verbindung nicht wieder herstellen lassen, dann habe ich die Verbindung in der Zappi zum Hub gelöst und wollte diese neu einrichten. Leider klappt es nicht. Die Zappi ist als Master konfiguriert und sucht auf dem richtigen Kanal, findet aber nichts. Was kann ich tun?

Rather than run in 3-phase with current limiting (my grid import limit is 80A), the Zappi system decides to go for single phase mode and limits the drawn current to 24A (5.6kW) on L1 of each Zappi, giving a combined L1 demand of ~76A.

Bei den zappis ist jeweils "Strom Max" auf 15.6A und bei der als Master konfigurierten zappi ist "Netzlinit" auf 50A eingestellt. Soweit also alles prima und jede der beiden zappis funktioniert sich alleine hervorragend. Allerdings möchte ich die beiden zappis gerne auch mal gleichzeitig mit dynamischem Lastmanagement (mit maximal 11kW ...
